POWER X-CHANGE BATTERY WARRANTY

Warranty extension for Power X-Change batteries to 3 years.

EINHELL BRUSHLESS WARRANTY

Warranty extension for all PurePOWER Brushless products to 10 years.*

* This warranty covers only defects in the engine that are due to a material or manufacturing defect

**CORDLESS FREEDOM.
FOR DIY ENTHUSIASTS AND
HOBBY GARDENERS.**

At last – no more too short or severed cables.

When you have no longer to worry about extension cables that are too short or sufficient sockets. When the device comes to the project instead of the other way round. When you simply insert the battery and are ready to go, whether it is a lawn mower, garden pump, rotary hammer or wet and dry vacuum cleaner. Than that is the feeling of cordless freedom.

**1 BATTERY FITS ALL TOOLS.
THE BATTERY SYSTEM FOR THE WORKSHOP,
GARDEN AND YOUR ENTIRE HOME.**

Just as versatile as you: Battery power for every situation.

With more than 300 battery operated DIY and garden tools, our battery platform Power X-Change is already the broadest for the ambitious DIYer and amateur gardener. And it's not stopping there! By the year 2027 the battery platform will feature more than 450 tools. What's so special about it is that all products from the Power X-Change platform can be operated with just one battery type (18 V).

**POWERFUL MACHINES.
LONG-LASTING BATTERIES.**

Battery power for all your projects.

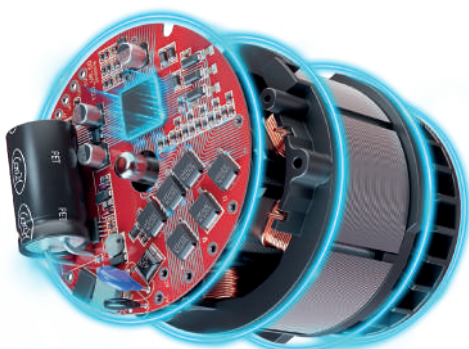

Less power? No way! Our cordless machines offer up to 2700 W of battery power and 8 Ah of capacity, making them easily a match for corded machines! Whether you just want to hang a shelf or drill through a solid concrete wall, with Power X-Change you are equipped to meet any challenge with power and endurance.

**LATEST TECHNOLOGY.
PROVEN QUALITY**

For the highest level of safety and performance.

Power X-Change batteries are the core component of our platform. That's why we use only the best components such as high-performance new-generation cells and our intelligent processor-controlled battery electronics. This makes our PXC battery one of the safest in the industry and ensures efficiency, reliability and durability.

**EINHELL PROFESSIONAL.
MORE POWER FOR PROS.**

True Pros always give MORE.

Because every step demands perfection. Where precision is a must. And every second counts. Professionals also expect more from their tools. Now Einhell gives them more: More performance. More endurance. More warranty. More lifetime. More functionality.

ACTIVE BATTERY MANAGEMENT SYSTEM. INTELLIGENT ELECTRONIC CONTROL SYSTEM.

The computer-assisted Active Battery Management System permanently monitors and controls all the safety-related processes of the electrical components and associated hardware. This results in a whole range of advantages:

- MAXIMISED RUNNING TIMES
- OPTIMISED TOOL POWER
- LONGER BATTERY SERVICE LIFE
- INCREASED SAFETY

TWIN-PACK

18V + 18V = 36V
TECHNOLOGY

TWIN-PACK TECHNOLOGY. 18 V + 18 V = 36 V.

If extra power is required for more power hungry tools, two 18 V battery packs can be simply combined in a single 36 V tool using Einhell's twin pack technology. Doubling the voltage (V) automatically doubles the power (W) as well. Double twin pack technology also lets you work longer without the hassle of having to recharge. In this case four batteries are used. When the power of the first two batteries finally runs out, the system automatically switches over to the two additional batteries.

SEALED TECHNOLOGY. THE NEXT GENERATION OF BATTERY TECHNOLOGY.

Waterproof and completely dust resistant? Yes, it is possible! Our Power X-Change batteries with SEALED technology are waterproof and dustproof according to protection class IP57. Whether it's water, or dust from wood or metal – the SEALED battery with the blue ring can withstand anything you throw at it and won't suffer damage even after 30 minutes in 1 m of water. Once it is dry, it can be used again as normal in all Einhell Power X-Change cordless tools.

With the SEALED batteries, Einhell is developing the next generation of rechargeable battery technology and once again demonstrating its concentrated expertise.

CHECKLIST: IS MY GARDEN SUITABLE?

Lawn area of uniformly green colour

Clearly defined and recognisable lawn edges*

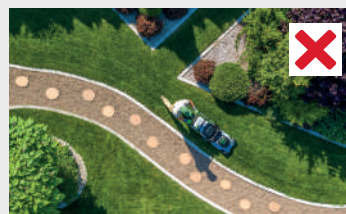

Simple design, uniform shape

Irregularities in colour (e.g. leaves, scorched areas)

No clearly recognisable lawn edges

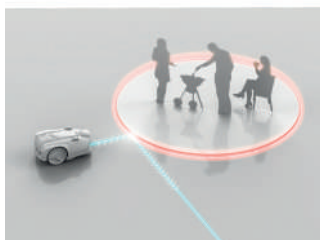

Many separate areas, bottle-necks and recesses

* The lawn area needs to be checked for suitable lawn boundaries

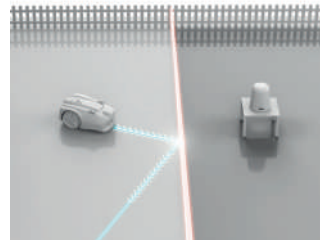

MADE POSSIBLE BY A VIRTUAL FENCE – THANKS TO MAGNETIC TAPE ACCESSORY

Lay the supplied magnetic tape in the garden and it will act like a virtual fence. The magnet sensors installed in the FREELEXXO CAM detect the magnetic tape and turn away at its limits. In this way you can create off-limit areas at short notice.

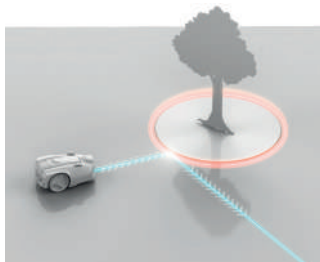

A TEMPORARY OFF-LIMITS AREA

When you want to hold a garden party and need to keep the robot lawn mower at a distance for the duration of the celebrations.

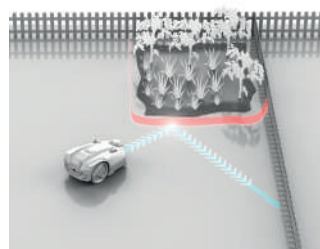

FLOWER MEADOW IN THE GARDEN

A flower meadow in the garden is just beginning to grow and is attracting the first insects. Now is the wrong time for the robot lawn mower to pass through.

NEWLY PLANTED TREE

A tree has been newly planted in the lawn area and is still sensitive. To protect it from collisions with the robot lawn mower you can use the virtual fence.

LAWN EDGES MADE BETTER

Lawn edges that are poorly defined or hard to recognise by the robot lawn mower can be upgraded by the magnetic tape for optimum demarcation of the mowing area in the garden.

SEALED TECHNOLOGY. NO CHANCE FOR DUST AND WATER.

Officially tested to IP57 protection class.*

WHAT DOES IP57 MEAN?

DUST 5

Protected from all types of foreign bodies and dust – be it wood, brick or metal.

7 WATER

Protected from high pressure water spray and temporary submersion – to a maximum depth of 1 m for up to 30 minutes.

In addition to the sealed housing there is a sensor controlled safety cut out to prevent short circuiting under water. After the contacts have been dried, the battery is ready for use again.

* Protection according to IP57 applies to the battery itself. It does not apply to tools operated with the battery.

PLUS TECHNOLOGY

By switching to the new "21700" cell format (21 mm diameter, 70.0 mm length) our latest Power X-Change batteries have acquired the best combination of power/running time and weight.

Why? Using this cell technology it is possible to achieve the same power and running time with five cells instead of the previous ten.

Benefits? The new batteries are 12 % lighter and 13 % more compact than their predecessors – at 100 % power and running time.

Results: Light-weight all-rounders energy-intensive applications such as in cordless chainsaws.

	➤	<p>⊖ 13% more compact^{*)}</p> <p>⊖ 12% lighter^{*)}</p> <p>⚡ 100% power</p>

*) in comparison to the conventional 4 Ah battery

MULTI-AH TECHNOLOGY

Thanks to MULTI-Ah technology, switching over from a 5.0 Ah battery to a 8.0 Ah battery is really easy and can be done with just the push of a button.

The 5.0 Ah battery has a 3x longer total service life and is suitable for lighter applications (e.g. cordless lamps or cordless screwdrivers). The 8.0 Ah battery offers the maximum running time for more capacity-intensive applications (e.g. cordless lawn mower or cordless wet and dry vacuum cleaners).

5 Ah	➤	⊕ 300% more service life ¹⁾
8 Ah	➤	⊕ 60% more lifetime ²⁾

1) In comparison to every standard lithium-ion battery
2) In comparison to the 5.0 Ah battery

ONE BATTERY FOR ALL DEVICES – TWIN-PACK TECHNOLOGY

Every Power X-Change battery from Einhell has a voltage of 18 V. If more power is required for more powerful tools, **two 18 V batteries are simply combined in one 36 V device** thanks to Twin-Pack technology. Doubling the voltage automatically doubles the power.

Double Twin-Pack technology allows you to work even longer without recharging. This uses four batteries. If the first two batteries are empty, the system automatically switches to the two additional batteries.

ACCESSORIES – BATTERIES

One battery for all devices

Our rechargeable batteries are not only available individually (solo item), but also in a Twin Pack. To get started in the Einhell world, we recommend choosing a Starter Kit (battery + charger)

CAN BE CONTROLLED FROM EVERYWHERE

The smart pump can now be controlled from anywhere* using a smartphone, thanks to the device's mobile internet connection.

SCHEDULE MODE

The pump's operating times can be set to the minute using the Schedule Mode.

SMART MODE

In smart mode, the pump automatically creates a schedule that is optimally adapted to the weather, customer preferences and behaviour. The pump learns the customer's behaviour based on the application (using AI).

NETWORKABLE WITH EINHELL SMART TOOLS

Einhell Smart Tools work together automatically in Smart Mode.

CONSIDERATION OF WEATHER FORECASTS

In Smart Mode, the pump adapts to the local weather conditions thanks to weather forecasts in order to achieve the optimum result.

NO WIFI OR BLUETOOTH NEEDED

Unlimited range thanks to communication via the mobile phone network.

SEALED
TECHNOLOGY

**SEALED TECHNOLOGY.
NO CHANCE FOR DUST AND WATER.**

Officially tested to IP57 protection class.*

WHAT DOES IP57 MEAN?

DUST 5

Protected from all types of foreign bodies and dust – be it wood, brick or metal.

7 WATER

Protected from high pressure water spray and temporary submersion – to a maximum depth of 1 m for up to 30 minutes.

In addition to the sealed housing there is a sensor controlled safety cut out to prevent short circuiting under water. After the contacts have been dried, the battery is ready for use again.

* Protection according to IP57 applies to the battery itself. It does not apply to tools operated with the battery.

PLUS TECHNOLOGY

By switching to the new "21700" cell format (21 mm diameter, 70.0 mm length) our latest Power X-Change batteries have acquired the best combination of power/running time and weight.

Why? Using this cell technology it is possible to achieve the same power and running time with five cells instead of the previous ten.

Benefits? The new batteries are 12 % lighter and 13 % more compact than their predecessors – at 100 % power and running time.

Results: Light-weight all-rounders energy-intensive applications such as in cordless chainsaws.

4.0 Ah	➤	4.0 Ah PLUS	
	➤		13% more compact ^{*)}
	➤		12% lighter ^{*)}
	➤		100% power

*) in comparison to the conventional 4 Ah battery

MULTI-AH TECHNOLOGY

Thanks to MULTI-Ah technology, switching over from a 5.0 Ah battery to a 8.0 Ah battery is really easy and can be done with just the push of a button.

The 5.0 Ah battery has a 3x longer total service life and is suitable for lighter applications (e.g. cordless lamps or cordless screwdrivers). The 8.0 Ah battery offers the maximum running time for more capacity-intensive applications (e.g. cordless lawn mowers or cordless wet and dry vacuum cleaners).

5 Ah	➤	+ 300% more service life ¹⁾
8 Ah	➤	+ 60% more runtime ²⁾

¹⁾ In comparison to every standard lithium-ion battery
²⁾ In comparison to the 5.0 Ah battery

ONE BATTERY FOR ALL DEVICES – TWIN-PACK TECHNOLOGY

Every Power X-Change battery from Einhell has a voltage of 18 V. If more power is required for more powerful tools, **two 18 V batteries are simply combined in one 36 V device** thanks to Twin-Pack technology. Doubling the voltage automatically doubles the power.

Double Twin-Pack technology allows you to work even longer without recharging. This uses four batteries. If the first two batteries are empty, the system automatically switches to the two additional batteries.
